

[[Isaac Hunter 'junior'](#) as he styled himself in these letters, was the second chief smelting agent of that name for the Blacketts at Dukesfield Mill and Hall. His father was still alive until 1780, hence the 'junior'. These transcripts are taken from an old volume of office copies of business letters, with a few loose-leaf drafts found amongst the pages. They date from between 1773 and 1794, mostly from the second Isaac Hunter and – towards the end- some from his son, the [third Isaac](#). The volume was part of the estate of the late Arthur Roberts of Lunedale and was given to the [Friends of Killhope](#) charity by his widow, which kindly made it available to be photographed for transcription. The volume has yet to be assigned an archival piece reference, hence the nnnn presently shown in the title. Transcription is not yet complete; this document will be added to in due course.]

I was surprised to find in yours of the 4th. inst. no other accot. than that the Clerks at Allanhds. & Rookhope Mills Accots. agreed wth. yours, & that you expected Dukesfd. woud do the same, when you know that Mr. Richmond requires of me to have a General Accot. every year of the Quant[ity] of Ore sent in the year to the several Mills fm each Mine that if any difference should happen we might ha[ve] them adjusted before either the Mines or Mills Decr. Qr. Accots. are sent to him, as he chooses that the Mills & Mines Accots. should agree as near as possible at the end of the year. I saw Mr. Salkeld to day & he says he has not recd. an Accot. fm Mr. Allgood for last yrs. Ore, therefor must again desire of you to send me the above required

Accot. I have sent the Bearer John Noble to supply the place of Jno. Steel who I have taken to this Mill, you may let him work wth. Edwd. Foster till I come over & if we then see that we can fix them otherwise more for the advantage of the Master shall alter them.

I recd. yours as to the Stephinsson's breaking my Order first, but you do not say whether they run the Lead too hot by it, or not, for it was to prevent that that ca[u]sed the Order, nor do you give any reason for their doing it at this time; wch. I find on inquiring to have been f'm having the Hearth to build – the order never was [struck out: 'intended'] ment other than to break them of the method they were then got into, & there are no exceptions, by the approbation of the Clerk, & his seeing that the Lead was not run too hot – wch. makes me doubt your complaints of them proceeds more from a private pique or ill-will you have taken to them, than f'm any harm they have don to the Master, and I cannot help telling you, that I am very sorry to think you should make the least use of your Power as Clerk at a Mill in revenging any little private grudge or Peek you may take to any of the Men imployd. I do assure you that I would discharge every Man f'm the Work reather than they should be under no subjection to the Clerk – but I would not have you to think that I mean other wise than wth. regard to the Business at the Mill, when ever their actions clash wth. the interest of Sr. Walter's Works

and I am sensible tht a Clerk may have his Men in proper subjection & their Esteem at the same time; it gives me no exalted opinion of the conduct of a Clerk, to find him & his Workmen at Variance, for its an certain Axiom wth. me that the Clerk of Smelt Mill who's plans of carrying on the Work are solely influenced by the intrest of the Master must be a Friend to the Smelters – there's one thing wch. this reminds me of to desire that you will give order to prevent your Sistr. going to the Mill to find falt wth. the Men. &c

Compy have not advanced their Ore Carriage (as their Agents tell me) tho' all the Carriers are on Carrying their Ore & Lead. If you think proper shall propose to make them a Pay for what they carry before Lammas in Octobr. as we did in the yrs. 69 & 70 when Carriers were bad to get - & the Lead Compy paying the Carriage of their Ore & Lead the latter end of the yr. is a means of their getting more Carriers than We the begining of the Season, when the Wages are Equal wch. I believe to be the case at present, tho' cannot say that the above proposal will do at this time without an advance, how ever think it advisable to try it for a short time as the Season is but young & am

I have frequently complained this Season of the Want of Weight in the Ore recd. f'm your place & finding at several times when at the Mill that there were some of the

Carriers that I then had wd that some had & others wanted Wt. made me order all the Ore that came last Week to be weigh'd and an accot. kept of the deficiency; wch. amounted in the Week f'm your Grove to 444 lb near 2 Horse of Ore; I have inclosed the Names is of the Carriers & the Quantity each wanted that you may make them make up the deficiency. Whether the falt is in the Person that delivers the Ore or the trickishness of the Carriers I know not, however, the delivr: ought to be more attentave to prevent any taking up Ore short of Wt. for the future & am

Mr Richmond N.Castle

Sir

Potts is a Stranger to me, and I have not been able to learn as yet more than that he was a Miner when he left Derwenhead (where he was born) & went to Work as such at Fallowfield; that he's past his prime of Life, and was very well thought on when at the Mine & in Derwent head as a diligent, sober, Honest Man. I should suppose f'm his having the conducting of the Mill at Fallowfield for some years past, that he must be qualified for the place at Rookhope, for I know that Fallowfd Ore requires to be

skillfully delt with. Geo Lowes is a Sly cunning Man & in my opinion not qualified for the place. There's One Robson of Birkenhead I hear means to offer who wrought as a Smelter at Mr. Errington's Mill for 4 yrs. & the Agent there gives him a great Character as to Skill & abilities I do imagine that you cannot be wrong in fixing any One of the Three (ie) Potts, Smith or Robson so shall wate your further Orders as to whom you would choose to have sent down to you.

Shall finish the Ore at Rookhope this Week & it will be 3 or 4 Week before we will get f'm the Mines what will keep her going. shall repair the <Bank> &c next Week, & if you think proper would start the Lead Carriage f'm the Several Mills as the Oate-seed time is near over. I have sent the Hand bills in to all the Daleheads & little Vilages in round that Neighbourhood. I made a Mistake in the Amount of the Dec qr in the calculation I gave you in my last as to the Sum it would take to make the Pays here; it will take as near as I can guess 4660£ exclusive of the New Castle bills these paid in the General Accot. & am yrs. &c IHunter Jr.

I have examined the Stock at the Mill since I recd. yours & find it to agree wth. the Accots. so that Mr. Walton has not charged the Smelting of the 10 ps. that you have recd. more than he has made in his Accot. delivd. as I have the Mill Accots. by me shall make them agree wth. your Tickett wch. I have / here wth. sent / on the other Side you an estimate of the kinds / sorts / of Lead that we shall be able to send to Blaydon f'm the Several Mills this Year in case the Mines keeps us going wth. Ore wch. I hope there's little doubt off I am like to think that Mr. Mulcaster must be mistaken in the calculation of Refinable Lead to be sent to keep the Refinery going at B.don this year, its near 5000 ps more than they had last year & I find by Mr. Richmond Order to me last Year was but 9500 ps: I suppose (as you'll see on the other side) to be able to Delivr: f'm Rookhope 11600 8 st ps =8300 ps of 11 sto ps. nearly. We have Killhope Ore at this Mill that will make 400 ps. of X Lead & should hope befor the season is over to get what will make the 1000 ps & shall out the Remainder wth. Coalcleugh Lead f'm this Mill, wch. will reduce the Quantity of Common Ld. calculated on the other side to be sent so much. Sir

By Mondays Carrier you'll receive a plate of Silver as p[er] inclosed Accot. Rookhope Mill was set on Fire last Tuesday morning but Fortunately it was discovered soon or the whole Building would have been Burnt down the damage don I think will not exceed 6 or 8 £ but will hinder us a little in Smelting as it lays of[f] one of the

Hearths – have set on Workmen to get it repaired as soon as possible. How it happened cannot say it began among the Peats that was got in to the Mill for Smelting & think a spark of Fire must have gon f'm the Hearth when they were taking the Fire out of Her – others think that it had been set on Fire intentionally ; tho there's little cause for that Suspicion, than that the Smelters that left the Mill last are very steady & carefull Men and that the Clerk was in the Mill an Hour or more after they left Her, and that He left a Man getting in Peats who stayed a good while after him and that neither of them perceived the least smoke when they left the Mill. I have ordered 2 Men to attend Her the Nights till she's made secure (wch. I expect will be in a Weeks time) for we are sure that there's Idle People frequents Her to steal Firing.

I was at the meetg. in Gateside last Monday. Mr. Askew & part of the People of Gateside attended & gave their Consents to accommodate the Road as to Ground as much as in their Power. Old Mr. Walton & Mr. Leighton were there & seemed to have little doubt but that both Ld. Ravenworth and Ld Strathmore would comply wth. the requests of the Subscribers in regard to the Ground the Road is to go through – the Bridge was not let but reserved to a future day (Tuesday in the Assize Week) for the Gentlemen by the advice of Mr. Smeaton agreed to lower the elevation & make the ascent on to the Bridge easier, so the Proposers had their Plans return'd to make the sade alterations against the meeting when the Road is to be finally settled as to the Way it is to go; there was two ways proposed for the Branch to the Lead Way wch. is to be viewed by a part of Gentlemen before the Meetg. wch. seem'd to be the only part of the Road that was not then fixed the Way it was to go – the Gates & Toll was never spoak off. Sir Thos: Clavering desired that I would acquaint Sr. Walter that they were in hopes that He would favour them wth. his Subscription & consent as a Lord of Winlinton against their next meetg. I expect to get the Plan for Sr. Walter in a few days time & then shall send it wth. as particular Accot. of the Roads as I can give. I have got a few Assays of Lead by me & shall indeavour to have the whole against the Assize Week & if its thought that I should attend that meetg. of the Road shall bring them down wth. me & am

Dear Sir

I have below given you an accot. of the Quantity of Ld delivd from each Mill this year for Blaydon; there will be more 8 stone Ld Delivd from Rookhope & perhaps three or four Fothers of 11 stone ps but not any more from the other two mills than the quantity named, so that when you have rec.d it you'll please to acquaint Mr Blackett, that he may fix the Day for paying the Carriage from the Bankfoot to Blaydon which you may advise me of

I saw the other day a Letter from Mr Adams of Alnwick to the Surveyor of the Highways for New Ridley to attend at Christmas Sessions with Witnesses to try the <traversight> Indictment of the Road between the Lead Hill & Hedley, which is what

Mr Fenwick spook off at the meeting in the Assize Week. as Sr Walter has a Way for his Lead by the Lease of Apperley Lane I do think that the Lead Co. & the People of that Neighbourhood should support it themselves & if you think proper, shall acquaint the Ld Co's Agent that Sr Walter I believe will have nothing to do with it now as they deserted him at first, but if Sr Wr means to support the Indictment it will be necessary to be looking out for Witnesses

Sir

I have sent an Inventory of all the stock &c at each Mill as correct as the Weather would allow for. there was so much snow at Allanhds & Rookhope Mills that I could not examine the stock of Lead with the accots. tho I hope it will be right at them both for the Clerks says that they try'd the stock & their accot. of smelting before the snow fell & that they were then right. I took the dimensions of the Building at Rookhope as I could not make out the charge by the mill accots (which from the best intelgence I can come at was Built 40 yrs ago) and has computed from that what they might cost & the same for the Coal & Cinder Ho[use] at Allanheads. shall be in town this week & can then make what alteration you shoosse to have – should like then to consult you as to the propriety of applying to Sr Thos &c

Will it be necessary for Mr Salkeld, his son & two more Freemen (thats in this neighbourhood) who I think I could get to be sent to town at the Election?

By Mr Morrows of the 22nd inst I find that you want Refined Lead at Blaydon and as this time is the greatest throng in this neighbourhood of sowing their spring corn, am afraid that I can get you very little sent till that throng be over which I expect will be in a fortnights time if the weather prove anything tolerable – I can get none sent now without giving what they call the Winter Price & even then the Quantity will be so small (till the seed is got into the ground), that if you could possibly put off till after that time I think I could then send it briskly & at the Summer price.

I cannot understand why your Wood Carriers should not have the same usage this year as formerly, but least they should abuse the privilage they used to have, have consulted with Walton and we have fixed upon the following manner ie, that each 8 Horses shall carry 6 full Load of Wood to the Mine, to be entitled to Ore for the 8; and so in that proportion for the other No. of Horses. and that they go (while they have the wood in hand) 3 Days in the Week two to Allanheads one week & one to Coalcleugh the succeeding week twice to C[oalcleugh]h and once to Allanh.ds, which will be but 3 days at each Mine in the Fortnight which I dare say you will be able to have ore to answer. I desire that you may deliver no ore but to your Wood Carriers in the above manner till I see you (except what you send to Allanheads Mill by those named below) for I intend giving a list of those that are to have ore on the Set Days and would like to have your opinion.

I have consulted with Walton in regard to the Wood Carriage to the mines, and we have agreed to put it upon the following plan – the Wood Carriers to go 3 Days in the Week with Wood so long as they have in their Hands; twice one week to your place and once to Coalcleugh, the succeeding week twice to Coalcleugh & one to your place which he thinks will get up all the Wood, and that each 8 Horses carry 6 full Load of wood to be entitled to 2 Bings of Ore to the Mill and in that proportion for the other No. of Horses. I have wrot Mr Dickinson this – shall see you soon & then will settle with you who we will choose to let have ore on the Set Days – let Thos. Bell have whiles a catch of the Wood Days

Christr. Bell's son is now with me complaining of his yesterdays treatment, which if he tells the truth I think he has just case for it, 'that several Carriers who had no loding to the mine were allowed to have Ore & he sent away without'.

You are sensible how much Freemen presume just as the case of an Ellection and what clamor they make with only an imaginary case; and I do think (when it can be don without any injury to the Works) that they ought to have some little favours shown; which I beg may be don to him, notwithstanding what I wrote you on the 11th inst. for I make no doubt but either he or his father will go & complain to Sir Jno. Seeing Thos. You may set on Mr Dixon & Bell the server till all Sir Jno Trevelyan's ore be smelted, but you must tell them when you set them on that they will have to turn off[f] them that they may not think it a hardship when the time comes to quit – I do suppose that they will find it difficult to get all their Work as above, but they may follow in a little closer (ie) not let the Hearth be so long off at Nights, for they cannot well make hot Lead without being very negligent, and you must when you see a Hearth making too hot Lead make them draw her immediately - set Collingwood to serve the Slag Hearth while Bells at the Ore Hearth

On reflecting on the whole of the Facts that appeared yesterday in regard to the Offence committed by you, and after putting the most favourable construction that the facts would admit of, the crime is of so deep a dye that it cannot be past over without being stigmatized with some sort of punishment as an example to Others.

I therefore discharge you (for the offence of ordering your Servant to take Lead from Allanheads Mill whether the Clark there would or not which Orders he obeyed), from Carrying any Ore or Lead from any of Sir Thos. Blackett's Mines or Mills for the space of 14 days from the date here off, and then to be admitted carrier again as one that had never offended. I doubt not but you'll be sensible of the mildness of this punishment as you was fully yesterday of the crime, for it will at this time be little or no disappointment to you as the ore carriage will be hardly began at the expiration of the time you are excluded.

J.E. Blackett Esq. Newcastle

Sir,

Inclosed you have the Month Accots for the several Mills and the Accot. of the Lead refined for the last plate of silver which I hope you recd. safe on the 27 Ult. I see by the papers that Lintsgarth Farm the property of the late Mr Hutchinson is to be let at Allandale town on the 22d inst. and I hear that Mr Whelpdale who's left executor, has signified that if the Tenant that takes it has not great advantage by Rookhope Mill, that He'll pull her down. I suppose that when that Mill was removed nearer the Inclosers that it had been from a complaint that it would be injurious to that farm that had made Sr Wr. Blackett take a Lease of it at £16 per year which expired mayday 1761. its now let at £43 & I imagine that it will not give the present rent which makes him threaten the destruction of the Mill; it would be very prejudicial to the Business for any have a right to privileges at the Mill by farming that Farm and if you think he can molest Her, would it be proper to have the Farm Viewed by a judge before the day of letting and to bid or have some to bid the full value of the Ground as if there was no Smelt Mill near it.

I was at Allanheads and Rookhope Mills yesterday and think they will finish smelting all Sir J. Trevelyan's Ore at both these mills against the 14 or 15 inst. should like to have the Accot. from you against then, of the things that the Lawyers fix'd upon to be Valued, as I would then set about getting a fresh Value put upon them at all the Mills – Will it be proper to have an Agent (from other Works) that has been long experienced with SmeltMills with two or three skilfull Workmen to assist in valuing the utensils &c at the Mills?

We shall compute the Quantity of Lead that the Slags, Black Slags and Ore Tails at each Mill will yield, and the expence per Ton to be laid down at Blaydon and then you can value the Lead according to the sorts.

J.E. Blackett Esq. Newcastle

Sir,

I have here which sent you the smelt Mills Q.r Accots for March & June and also the Estimates of the several Wastes &c at both Mines & Mills which the Agents desired me to forward to you.

I am afraid we shall not get all Sr. J[oh]ns Lead delivered in time for the Pay at Xmas the backerly harvest & late wet Weather has made the Wainmen slacken so much both at this & Rookhope Mill, that I doubt it will be some time before all Sr. Jno's Lead be moved from that Mill, for when there on Saturday there was between 3 & 4 Thousand Ps. I sent among the Carriage men on Monday & offered them a little advance of prices; what effect it will have shall acquaint you when in Town which I intend to be on Monday next for Subsistance Mo[ney] - shall come by Blaydon, so that I will be able to give you an accot. of the Lead upon the Ways – The Deliv.y of Sr. Jno's Lead from this Mill = 28,236 Ps.. the last Accot I had from Mr Morrow was on the 2nd inst. and he had recd. 25,684 Ps. we have to send from this Mill of Sr Jno's 382 Ps. (of) 8 Sto. Lead which kept for this Ref[iner]y but our Ref[ine]r Laidley is very ill & I doubt will never work more, so obliges us to send it of which will make this plate a small one. The Refined Lead 620 Ps. & there may be near 200 Ps. more against the Silver is taken off which will be from the beginning of next week – have delivd. of Sir Thos. Blackett's Lead 613 Ps., resting at the Mill 1632 Ps. so that if the Weather would stand good for a while could send you 3 thousand Ps. of his Lead (from this mill) this backend – Have finished at all the mills smelting for Sir John now, & shall acquaint you (when in town) of steps taken in regard of Valuing of Utensils &c

& am Sr. with due deference Yrs &c IH:Jr

Dear Sr

I recd a line from the Clerk of the Skinnerburn Foundry in regard to the Sum we had made due to that Foundry in the Pay Bill, and find on examining the Accots. that we have charged the Cast plates for the Refinery twice, so that you must deduct £10. 3s. 3d from the due in the Pay Bill wch will their demand on Sr. Jno. I should like to hear from you in what manner Mr Blackett will choose to have the above Error rectified, whether he'll let the Accots. stand as they are and me to account for the over charge to Sr. Jno. after as there will be several little things to charge to Sir Jno. after the Pays, or to have it taken of the Accots. &c &c I am yrs IH Jr

Inclosed you have the Month Accots. for Decr, Jany. Feby. & March for the several Smelt Mills & also the Pay Bill for the Lead Carriage fm Apperly Bank ft to Blaydon paid there on the 12th Jany. last – I had them all with me when at N.C. (vizt March Accots) and forgot to give you them. I was at Rookhope on Thursday, and except a snow wreath or two think the Draugh[hts] may get to her in a few days time so took some of the Wainmen in my return home who promised that they would start with that Mills Lead (i.e.) Sr. Jno Trevelyan's next Week so that I hope we shall get you it all to Blaydon against Mayday if the weather keep fine tho they will not go briskly till they have got their seed into the ground.

I recollect your saying that you had greater demands for Litharge then You could supply at Blaydon, we have some Ld wch I understand answr[s] well for Litharge and if you think proper that we should work it directly and sent it in Litharge to Blaydon might be some help to your supplying the demands; there will be an addition of expense upon it but when the Carriage of the Lead is deducted from the Litharge that will be but trifling; but, its a thing that I'am a entire stranger too, therefor hope you'll excuse this hint, and if you think it will at any time (when there's little demand for Lead &c) be an advantage to the Business shall endeavour to make my self more master of it. My not hearing f'm you today makes me thus remind you of the Accots. of the rects. of Rookhope Lead for these two years past wch you promised I should have this week when with you at N.Castle, for I cannot pay the Carriagemen wthout it, and you should before this let us know who to lay the Ld. wanting upon, for I'm afraid that the quantity will be so great that there will be some difficulty to get it all paid for. I have re-examined the Mills Accots. of the delivy and find them the same as formerly given you (viz)

A copy of the Delvy fm each Mill for 1776 & 1777 wth his rect.

so that the want will soley ly on Rookhope, by the above accots. wch I make no doubt but are right, tho I recolect you saying you had recd. more f'm Allanhds then was delivd f'm her by her own Accot. wch might by mistake been placed to her instead of Rookhope, but if one had your Accots. or if you had taken a little pains to have compared your Accot., wth that Mill's (Rookhope) particular Accot. of delivy, and where they differed, to have reckon'd wth the Carriagemen have not the least doubt, but you might long ere this have had all Sr. John's Lead at Blaydon or at least known who were to pay for whats wanting; wch must be the case at Last. Last Friday I paid the Carriagemen for Sr. Jno. Trevelyan's Lead brought f'm Rookhope Mill last spring agreeable to the notice given, but am sorry to say that there was a great outcry against you (for I could only pay those that you had marked as right upon the accot.) for want of your Tickett, I would not have believed that you would have been so negligent, or indeed treated me with so much contempt as neither to give an answer to my Lre's or send me the Accot. of the above Mills Lead when I acquainted you at N.Castle on the 6th. inst. that I would pay the Carriers the Week following therefor beg'd to have your Tickett before then.

The Lead wanting fm the above Mill belonging to Sir John will make a very serious affair for by what I can learn there will be above 40 ps wch must be paid for by some of the Carriagemen, and I doubt that you will not be able to fix them upon those that you have in the Accot. sent me, as I saw one who you made (in that Accot.) a defaulter have a Tickett f'm you for what he took f'm the Mill. However I must once for all tell you that I shall be obliged to lay the whole affair before Mr Blackett the latter end of this Week, so if you can before then send me your Tickett of the rect. of the Lead fm Rookhope for 2 yrs past and also an accot of the Lead wanting that will palliate the matter, shall be very glad of it, otherwise it must appear in the same dark shade to the Alder[ma]n as it now does to me - the consequence I dread, not with standing what I have said of your treatment, do assure you that I should be much hurt both on your & my own Account if the Ald[er]man should take any disagreeable steps towards one who I had in the yr 72 said 'that his Character as to Honesty, Sobriety, Ability and diligence in Business are universally allowed, and his living a great part of his life in the Neighbourhood so as to know the genius of the People believe him to be a very proper Person to succeed Mr Reynoldson.' If your own wellfare will not make you more circumspect as to your Business &c

I hope your sensibility will have some influence, when you reflect how disagreeable it must be to be obliged to complain of the negligence &c of the same Person recommended above and in a manner to the same Power. I am wth best wishes &c

Not hearing f[ro]m Mr Silvertop's Tenant as he promised, I called a second time at his house, but did not meet w[ith] him at home, so desired S'r Thos Blackett's Tenant at Crook Oak to enquire of him (i.e. Silvertop's Ten[an]t) and let me know w[ha]t answ'r he got f[ro]m his Landlord; the inclosed is an acco't of what he told him, by w[hi]ch I think Mr Silvertop means to keep the Close f[ar]m in supposition that it's not of that consequence to compel him by law to give it up.

Have got the Ore & Lead Carriage started at all the Mills and we have already deliv[er]ed 4000 p[ie]ces f[ro]m both Dukesfield & Rookhope Mill; and I expect we shall clear all the Mills of C. L[ea]d before Mayday. I should like to know before I meet the East hand Wainmen to treat w[ith] them for the Carriage f[ro]m the Bankfoot to Blaydon of the Dukesfield & Allanh[ea]ds Lead for this Year, when it will be convenient for you to let me have Cash to pay them for the last y[ea]rs Carriage of that Lead. Not hearing from Mr Morrow since I last saw you makes me thus trouble you to desire that you'll let me know the quantity rec'd of S[i]r Thos Blackett's Rookhope L[ea]d of each sort, Mr Morrow in the Acco'ts I last had fr[o]m him makes 9568 11 st. p[ie]ces & 10,998 p[ie]ces w[hi]ch is 16 p[ie]ces more then the Mill acco't of the 11 stone Lead and 23 p[ie]ces short of the Mill of the 8 stone p[ie]ces so that the difference in point of weight is but trifling w[hi]ch makes me think he has made a mistake between the 8 & 11 st. p[ie]ces. I hope he has been able to get to N.C before this. As the Lead Carriage from the Bankfoot will begin on Monday shall be obliged to you if you'll give me a line how he goes on for I'm afraid as he has lost his Gd.son that the carriage will be neglected. The Coalcleugh Ore smelted at Rookhope Mill Mr Smith has marked with a L not joined to the WB as the other L Lead f[ro]m that Mill is mark'd w[hi]ch is all the difference for you to know it f[ro]m the Slit L[ea]d. I have order'd the Slag Lead made f[ro]m that Ore to be marked with a C. as it will be worth refining for I suppose you do not refine the L. slag from Rookhope

If you should want working lead there's a cart of the Dukesf[iel]d X [see image below] at the Bankf[oo]t w[hi]ch Mr Morrow should order the Carriagemen to bring you first to keep you going till the Rookhope L be got down.

I'm sorry to find when at Allenh[ea]ds mill last Week that what was agreed between you and me last Spring (in regard to the Lime you was to supply that Mill with) has not had the desired effect of preventing future complaints of want of Measure in the Loads sent; as we agreed there should be a Measure sent to the Mill as a standard and in case you could not afford the quantity - by it at the price that I was to advance it in proportion to what it might be larger then w[ha]t you sold to the Country - Mr Sparke tells me that 5 of your Loads will hardly by 2 1/2 by the Measure at the Mill and that your man (that brought Lime to the Mill that morn[in]g that I was at the Mill) told him that he should have no better measure then what he then had upon his Horses and in case he would not charge them as full Loads he had orders not to leave them but to take them elsewhere - if this be so its quite contrary to what I expected and the agree[men]t above referred to - I should like to hear from you for I cannot suffer such things to pass un-redress'd - should have wrote you sooner but expected to have seen you at Stagshaw bank & talked the matter over - I'm yrs &c

Sir

Both yours I rec'd in due course and should have answ'd your last sooner, but expected to have got Rookhope Acco't that you might find in who's hands that Lead wanting are in; but on second thought, think it will be as well to send Mr Smith down - the quantity deliv[er]ed f[ro]m Rookhope last yr of Eleven sto[ne] p[iece]s 8,261, Eight sto[ne] 11,229 w[hic]h makes 358 of the former & 2586 of the latter went at Blaydon by your Rec't.

I think it will be as well to refer making the east hand Carriage pay till we see whether the 13 p[iece]s wanting can be made out, for I am as much persuaded as you possible can be that they are not in the hands of the West Carriers; I would hope that they are not lost, and the quantity is too great to be hid among the mud at the Bankfoot; I reather think they have been hid or cast out of the way through spite one to another of those who had Lead laid off to load out with after they got up Hedley Bank. last Spring we wanted 34 p[iece]s w[hic]h the West Carriers got the blam off, tho I was as confident then as now that there was not a Pig of it in their hands (i.e. the D[ukes]f[iel]d Leaders I would not say as much for Allanh[ea]ds as its goes many ways) and it was found among the Rookhope Lead as I recollect; may not the same happen this? however I think we had as well not pay the East Carriage till we be fully convinced that the lead wanting <cannot> be made out, I have wrote Mr Blackett to that effect, I wish we could for the time to come hit off some method that will remove the complaint by making those that takes it f[ro]m the Mills accountable the whole road as Rookhope. I find by Mr Mulcaster's rec't at Blaydon that there's 13 p[ie]ce[s] of the Dukesf[iel]d & Allanh[ea]ds Lead short of these Mills deliv[er]y for last year and he tells me that you have some thoughts of paying the Carriage f[ro]m the Bankfoot of that Lead the latter end of this month. I think it will be as well to refer paying that Carriage till we be fully convinced that the s[ai]d Lead cannot be found; it's too much (I would hope) to be either stolen or lost on the Roads and would reather suppose that (as it's not to be found in the hands of the Wainmen) that it has been tost into some out of the way place by some of them out of malice one to another; as they were allowed to unload some at the top of the Bank, and their not being paid till it's some how or other made out will make them all intrested in finding it. The severity of the Weather has hindered both Smelting & Refining this Winter much, so that it will be a Month before we will be able to send you a Plate of Silver (for I expect the Refinery will not be again hindered) and at the same time I shall bring you the Q[uarterl]y Gen[era]l & Month Acco'ts and will be obliged to trouble you for Subsistance M[one]y and hope the Lead now on the Roads will be all got in or some how made out.

I was sorry to find when at Rookhope Mill the 19th inst. that the Ore we are getting f[ro]m your Mines is no better dressed than what was sent the latter end of last year. I therefor beg that you'll give such Orders as will prevent my troubling you with further complaints on that head for I am certain that what's sent this Spring f[ro]m Middlehope that we cannot make a Ton of Lead f[ro]m 6 Bings of it, and what has been sent f[ro]m the other Mines is not a great deal better - the Mill produce will make a very poor Figure at Christmas in case there's not a great alteration in the Quality of the Ore thats to send from what has already come to the Mill this Season.

I am glad to find that there's some call for Lead & would hope that the prices are advancing also, w[hi]ch may case the Pays to bee a little sooner; for Mr Blackett wants all the Com[m]on Lead to markett & to know what we can Smelt & send him there before the latter end of Aug't I desire you'll hasten the Ore that you have at the several Mills that's not refinable to the Mill before the time mentioned that the Smelters may be less smelting of com[m]on Ore till the last week of Aug't. We begin to find the affect of the Pays not being in the Rookhope Carriage, tho' I hope in case you have it in your Power to make the Mills Pay when you make the Mines Pays in will

briskened our L[ea]d Carriage therefor by that you would put the Mines pays a little rather than make them separate for I am sure that it will damp the Lead Carriage so much once it's known that the Mills Pay is not to be w[ith] the Mines that we shall not be able to get the Rookhope Lead to Markett this Year - shall be able to judge better against the 19th inst. w[hi]ch I understand is the day that the Grove Stewards goes down for the Lent M[one]y when I hope it will be convenient to let me have 200 or 150£ for Subsistence for the Smelt Mills & Refinery, and shall then acquaint you more fully in regard to the Carriage and whether we shall be able to send the quantity against the latter end of Aug't that I named in my last

Yours of the 30th Ult I rec'd yesterday and am sorry to find by it that you will have so much Ore to lye over Winter at the Mines for it's too late now to make any

proposals to the Carriers that can answ[e]r any good end - it has been a complaint for these some Summers past that there was nothing for any but the Wood-carriers during the Prime of the Season. However shall do what I can (consistently w[i]th the future Carriage) to get a part moved if the Weather be any way tolerable; and shall take care to regulate the Ore Carriage f[ro]m your Groves against next year as I hope will prevent the Ore thats dress'd up before Michaelmas f[ro]m lying at the Mine. Yours w[i]th Hutchinson's Bills inclosed I rec[eive]d & Lee's son the other day, by w[ho]m I find that you have some what misapprehended mine, for it's my greatest pleasure to discharge the duty of my office to the satisfaction of all under my inspection, so as not to prejudice the Masters intrest. You are either misadvised or do not rightly understand what's required of a Person in my station; therefor, shall give you an account of one part of his duty w[hi]ch is that he's accountable to S[i]r Thos Blackett (or who he pleases to appoint to inspect the Acco[un]ts) for every article that's charged in the Mills Acco[un]ts as to the usefulness and equitableness of the charges &c w[hi]ch I shall (while in office) endeavour to discharge I trust confided in me as related above to the utmost of my power not withstanding any false notions of privileges – People may get into their heads – on my Visits to the other two Mills I always see the Bills of parcels & Books of Wages &c so that I'm fully satisfied before the Quart[erly] Acco[un]ts are made up, and should have been the same at your Mill, if it had not been for the Mill Office being misapplied for this two years past & your last bad Health w[hi]ch obliged the Acco[un]ts &c to be at your own House that I could not so conveniently see them on my Visits and not f[ro]m any respect of Persons. You say "that You'll let 'me know the privileges given you w[i]th Your place' w[hi]ch I shall be obliged to you for and soon, for I assure you if I have infringed upon them, it's been for want of knowing them – I must be very deficient and ignorant of my duty if I am to learn of you what were practiced by your predecessors. as to the article you name and 25 y[ea]rs experience (for I have don the Business for Fath[e]r & self so long) must make me have some knowledge what's requisite on the increase of Merit &c

I would not have you suppose f[ro]m what I have said that I have the least enmity towards you, it would give me great pleasure if I could be any way serviceable to you or your Family and it's my earnest wish to be upon a Friendly footing w[i]th my Clerks & that harmony may ever be among us is the sincere wish of

The Lawyer had not got the depositions &c from Mr Heron who was out of town on acc[oun]t of the Militia Business so did not see him, but the Lawyer said he would see the Mayor the next day & have some talk with him.

I think it would be right for you to discharge the Wainmen f[ro]m using the Turn Pike at the West end for I find they have used it this season (so far) for upwards of 3 Hundred Y[ar]ds w[hi]ch Silvertop will make an handle of to have a side gates fixed at where you cross at B.d.n. I shall acquaint Mr Blackett before the meeting that he may be able to make a reply to Silvertop that the Lead can come w[i]thout using the Road more than crossing at each end – but as the Turn pike & Lead Way at the Lead-hill are near & upon a Com[m]on it will be difficult to prevent the Wainmen at all times for going upon it at that end it might not be amiss to agree with the Trustees for the Use of that part by keeping it in repair and if you should be in Town between this & the Meeting might talk of affair over w[i]th the Mayor

I took a ride the other day to see how much the Carriage men went upon the Turn pike at the West end, and find they have (as far this season) gon upwards of three Hundred Y[ar]ds w[hi]ch I do suppose Mr Silvertop will make a handle of at the meeting tomorrow for having a side Gate at Winlaton Lane post - the Branch f[ro]m Mickly Bank to lead-hill is upon a Com[m]on or unenclosed ground, so that the Carriage-Men keeps the Turn pike so far as it goes near the Old road, but S[i>r Tho]mas Blackett's Lead can go down the old road by Winlaton without coming upon the Turn pike more then crossing it at each end. I have wrote Mr Mulcaster to desire the Wainmen not to use it at Apperley Bank as that will make them liable to pay the Toll – as the Branch and the old road f[ro]m Lead hill along Apperley bank for three or four hundred y[ar]ds are parallel and upon unenclosed ground it may be difficult to prevent the Carriage men at all times f[ro]m going upon the Turnpike at that part, and to prevent disputes on that Acc[oun]t it might not be amiss to agree w[i]th the Trustees for the use of that part of the Turnpike – I am

Sir,

I thought it was proper to acquaint you that there's a great Clamour made on account of the Pays w[hi]ch increase daily, and I realy doubt if there's not a stop put to it by fixing them, that Sir Tho[ma]s Blackett's Lead Works will be greatly retarded and prejudiced; I'm convinced that if the Carriers could get other work that the greatest part of them would leave us even now and that next Y[ea]r we should only get the out casts or be last sarved; the hopes of the Pay being before Old May was out got us briskly forward and w[i]th the Carriage this Spring. – If You could make the Pays against Midsummer have not a doubt but it would remove all complaints and establish the Credit of the Pays: however I wish you could name a time (tho the further distant) when they will be as it will not only disappoint the Malicious who endeavours to increase the clamour of the Country by insinuating that they will not be before next May, but ad greatly to the credit of the Workmen &c as Corn is got very High in the Marketts here and if Farmers will not give Cr[edit] without the day of payment is named

I am glad to find that the time you talked of at Allanh[ea]ds for the Agents coming for Subsistance will be before the Fairs that the Smelters usually get their

Winter Beef at so that I need not trouble you till then – I do think that I cannot do with Less than 300£ - we have got a Set of Miners cutting the new Race who will be to be supplied – the quantity of Lead deliv[ere]d f[ro]m the Several Mills this Sum[m]er to Blaydon (as you see by the Month Acc[oun]ts w[hi]ch I sent to Mr Peart the other day) is 47,208 ps including 20 thousand of Refinable Lead, and as Common Ld is so much wanted at Markett shall not Smelt any refinable while we have of the Com[m]on Ore; therefore have agreed w[i]th Pringle that he shall carry all the Refinable Lead that shall be made at Rookhope Mill before the 31st Dec[embe]r deliv[e]r it at Blaydon on against the 12th of May next at the Sum[m]er price on having 60£ advanced at Mar[tin]ma's to pay his rent with w[hi]ch eases the above demand to be so High; for I think it will be a means of helping the Refinery there w[i]th Lead in the Spring with out hindering the Com[m]on Lead being got early to Markett in case of a demand. am glad to hear you have so brisk an one now & at so good a price – Are doing what we can to get you com[m]on L[ea]d made & sent off at All the Mills but am afraid that Allanh[ea]d Mine will not be able to keep us with Ore while the Carriage is on, for when there last Monday I found that the Carriers had that day lifted all the washed Ore so do suppose we shall not be able to send to Markett this backend above 3000 ps more of Comm[on] L[ea]d including all the Mills. Sir,

I have made three Assays of the Newbiggin Ore, One f[ro]m the Round, another f[ro]m Round & Small mix[e]d the other f[ro]m the Small and find, taking the medium of these three Assays would require 5 Bings nearly to make a Fod[der] or 21 Cwt of Lead. I do suppose that the Ore I got was the best then at the Bank, so that one cannot expect to get a quantity to yield equal to it, but I think we might venture to calculate it's produce of Lead f[ro]m the yield of ye[the] Small w[hi]ch will take 5 Bings & 5/8 to the Fod

To 5 5/8 at £3/15s p Bing (the price sold at)	21 1 10 1/2

Cr

By 30 oz of Silver @ 6s	9 -- --	
By L. Lead 1/15 L of it	15 17 4	24 17 4

Gain[e]d 1 18 4

by the above calculation there can be no risk in giving the present price in case Lead does not drop before its got to Markett: as there's a reporting in the Country that Sir Tho[ma]s Blackett's for buying that Ore, will require great caution to come at it at a reasonable pr[ice] for I desay [dare say] if the L[ea]d Co[mpany] knows that S[i]r Tho[ma]s bids that they will put it above &c. I have had the moulds or Pig-Pans at the several Mills tried and find that they will all make 12 Stone pieces; those at Rookhope Mill are the least & only just held the quantity: so that when Smelting Poor Ore the Pigs may be short of weight and indeed at all times the Smelters must be attentive that the Pig Pans are always kept level – We keep the Acc[oun]t etc by the Foth[e]r (ie) 16 ps to the Foth[e]r or 22 Cwt if made 12 stone pieces must call 15 ps a Foth[e]r w[hi]ch will gain in the Smelting 2 cwt in every

Ton for I do not suppose that they will in the least Grumble at that as the over weight will on an average be equal to it – in the Carriage f[ro]m this Mill to the Bankfoot will loss a stone in every 10 ps as we will be obliged to give the same price for 10 ps that we now give for all for the Common People are too apt to suppose on any change being made that it had been for to get the advantage – the alteration you proposed can not in my opinion be of any detriment to the Works and if you choose that it should be made would advise it to take place at the close of this y[ea]rs Lead Carriage as it will prevent your having Lead sent to Markett <next> Spring f[ro]m the Mills of Different weights

Mr Gibsons the Clerk to the South Road told me when I saw him last that there would be a meeting of th Comm[issione]rs at Corbridge in March to let the Gates which would be advertised. I sent to him last Tuesday to know the day but he was not at Home. I doubt it will not be convenient for you to attend and that those Commis[sione]rs that will attend will be too much under the influence of Mr Silvertop for any think to be don in regard to Stella Barr without you. I spook o Mr Fuester Teasdale who said he would attend; but I expected that the meeting would have been at N[ew]castle I think one might get Cap[tai]n Smith, Major Surtees & Busby to attend in case you could meet them so as to prevent Mr Silvertop having the whole of his own way and if the Commiss[ioner]s would compound w[i]th Sir Thomas Blackett for his Lead at Stella Barr for a term of y[ea]rs would be better then to be subject every y[ea]r to those that takes that Barr w[hi]ch they cannot refuse if they pay any regard to the promise made to Sr Walter Blackett that no Barr should be placed there – shall acquaint you of the Day of meet.g once I learn it of Mr Gibson

Sir

I have herewith sent you the Quart[erly] Acco[un]ts, Rental, Pay Bill & General Acco[un]ts for the year 1784, all of which I hope you'll find right.

The meeting for letting the Barrs on the South Road was fixed at the last to be on the 20th at Corbridge where I hope you'll attend that a compound may be made at Stella Barr for Sir Thos Blacketts Lead; but, shall likely see you at N[ew]castle before then. I was at Rookhope last Friday & think that some Corn might be now got there & as the Smelters there are in great want of. spook to Pringle who promised he would go up with sum and would send Po[u]ches to Newcastle on Monday you'll please to order Mr Peart to give him a Tickett to get them filled w[i]th Rye. I wated upon Mr Ord in my return f[ro]m N[ew]castle in regard to the Wolfcleugh Ore coming through his estate at Hunstanworth & acquainted him with what I knew (f[ro]m my own knowledge) & what I had learned from the Neighbourhood of it being a public High Way, Mr Ord said that his Agent (Mr Ramsey) told him that it was not but that he would not dispute the matter w[i]th Sir Tho[ma]s Blackett, that his Tenant complained of damages w[hi]ch he would be obliged to make him an allowance for; I acquainted Mr Ord that we would do all in our power to prevent the Carriers from trespassing on his Grounds and if his Tenant would inform me of the Carriers that suffered their Galloways to graze (while they past through the Estate for the future) that they should be discharged f[ro]m the Carriage; Mr Ord thought that might be a means to prevent his suffering so much, though I think he would rather that Sir Thomas contributed towards walling off the Way; it's no doubt an disadvantage to have a Public Way through in Estate (for such I am convinced it is) that's not fenced off but , think its unreasonable for that Sir Tho[ma]s to be singled out as the only contributor because he happens at this time to make more use of it then others; if Wolfcleugh Mine should fail or the other Weardale Mines so that Rookhope Mill could smelt all that Ore, there would be little or no use made of that Way (for Sir Thomas's Carriage) (then on former) years for the Wood etc that's sent f[ro]m here to Rookhope.

There's a small Estate belonging to Mr N White of Hexham, that joins on the West of Sir Tho[ma]s Blackett's Estates, at Dukesfield and the Steel, which Mr Bell tells me will be soon to be sold (as White has failed) which I wish you would advise Sir Tho[ma]s to purchase as a part of it lies on each side of the Devils Water, it would inable us to make a more durable Dam then the present One which is built on a ragged Sil, broken by a Vain that closes it, and being tied to the present sight to get Level to bring the Water on to the Wheels) as the Water might be taken off 150 yds above the present at a trifling expence in comparison to what it would cost at the present place; in case this should be taken away the Estate is Copyhold & let (I believe) at £14 14s p[er] y[ea]r

Inclosed you have the Acco[un]t of the Plate of sliver sent on the 21st its Weight the same as Mr Peart makes it. I am in hopes that we shall this year get the Road cleared of the Lead and that the Deliv[er]y at the Mills will agree (nearly) w[i]th the Rec[eip]t at Blaydon; the last Acco[un]t I had f[ro]m Mr Emerson there wanted 32 p[iece]s of D[ukes]f[iel]d 252 of the Rookhope, and Allanh[ea]ds all in. Mr Smith tells me that he has made out the Rookhope & that the Carriagemen promised to have it to Blaydon in the course of a last Week and the Dukesfield Lead wanting Mr J[ame]s Hall tells me will be all th got in tomorrow so that I expect to hear f[ro]m Mr Emerson as the Carriagemen will be looking for their Pay once its all got to Blaydon. The Lead Carriage f[ro]m the Bankfoot by Mr Hall's Acco[un]t of the quantity rec[eive]d of the Rookhope will amount to Eight Hundred & Fifty exclusive of the Back Carriage but I have wrote t B. that <...> Acco[un]t of the Charge may be sent you once its finilly settled.

On second thought I think it will be as well if you stop the Lead Carriage f[ro]m the Mill next week that the Carriers may get what they have in their hands to Bankfoot or Blaydon otherwise they will not be able to fulfill the Conditions.

Your leaving Dukesf[iel]d on Sunday morning before I came down stairs prevented my having some talk w[i]th you in regard to your L[ett]re of the 1st & what you said the night before – when you was here some time ago you talked a deal in the same stile which I then imputed to the effect of Liquor as you took no notice the next day but a repetition in the same way has the appearance of something premeditated & the other used as a Cloak. I therefore desire, that when ever you have complaints of Workmen or Works or impositions in Sir Tho[ma]s Blacketts Works under your inspection that you'll do it in writing or officialy when I am surveying the Mill.

As to what you say in your L[ett]re of being informed that a Person wants to take the Carriage f[ro]m you appears to me to be just the reverse; I shall only ad that my power in office shall not be given up: but with my Agentship – you'll please to mind that none of the Draughts get any little Lead this year f[ro]m the Mill

The quantity of Test Bottoms at this Mill could not be wrought up here (with the present convinience) in less time then half an year w[hi]ch would increase the Gray Slags much as they must be wrought at the Slag H[ear]th. I have below made a calculation what Qant[ity] it will take of them according to the Tryal before made w[i]th the exp[en]ces charging the Test Bottoms at 4£ per Ton that you may judge f'm the price of Lead & the likeliness of it's continunce whether it would be most advisable for to abate of the 4£ or not; f'm the present state of the Mines there's little

Have made an Assay of 1lb of the Test Bottom Lead that we made a Trial of as to the quantity of Lead the contained in the Ton and find by the Assay that that Lead will yeild in Silver 11 oz to the Foth.r; the Assay I have inclosed that you may try it in your scales as being more accurate then mine. On the other side have given you a calculation (supposing that Sir Thos. can have for the Test Bottoms at this Refinery £3 / 11s per Ton) what a Foth[er] of Lead extracted f'm them would cost & also the exp[en]ces of Refining, Reducing & deliv[er]y at Blaydon. It will take 6 months to smelt all the Test Bottoms thats here w[hi]ch would cause one thousand ps less of Slag Lead from being sent to Markett, therefor have set 6 M[on]ths intrest for that quantity of Lead against the Gain - if Lead is likely to keep it's present price would not advise you to take loss the the above, though that you are the best judge off.

I find on Inquiring that Mr Archer was present and saw the Ore when Cariers took it up; Mr Westgarth sent to desire that he would not send it till better washed, I have ordered him to deduct from the quantity receved since it was sent so natorious 1/10. Archer gives a bad specimen of the cofidence placed in him, for it can nat be supposed that you can seal the Ore before its sent to the Mills; however I hope that youl give such orders as will prevent for the future any Ore being sent from your Groves til properly dressed.

[Note: The transcript of the actual letter sent (original in NRO ZBL/208) based on this draft is also available, but because of slight textual differences and in the subscriptions this transcript of the draft is included here.]

Mr Blackett

Dukesfield 29th Sept 1792

Att the meeting yesterday the Commitee & Surveyor produced a Plan & estimate of the intended Road pointing out the improvements to be made & the Expençe of each which amounted on the whole to £6500 & 0d, its to go by Marley Hill, with a Branch to pont Burn . A Subscription was opened & £4000 subscribed (as on the other side) another meeting was fix'd on the 25th Octob'r at Wolsingham at which the Commitee are to acquaint the Meeting with the additional Subscriptions, being desired to apply by Lre [Letter] to those they thought wished the Road well, & the Subscribers then to settle the places for the Toll Gates and other clauses of the Bill & choose their Solicitor, which they may do by Lre [Letter] in proportion to the sum Sub[scribe]d none under £50 to vote. Mr Ornby of Darlington & Mr Peter Hunter of Durham are the Candidates there's not a doubt a Bill will be carried in to Parliment & if Mr Beaumont does not Subscribe at the next Meeting his Agents cannot with any propriety propose any clause to be inserted in the intended Act. That a good Road through that Country to Alstone will undoubtedly be a great advantage to the Country in geniral & to Mr B Works there, by provisions &c coming cheaper. The Trustees ought to be limeted in their Power in the Act, or the Road will be long of being finished for it appeared at the Meeting that several of the Gentlemen that attended were very shy in having it any further than the Chapel [St.John's Chapel] & there's not more than 5 or 6 above Wolsingham thats qualified to be Commiss[ioner]s so that the whole of the Business will be directed by the Gentlemen on the other end of the Road that with out a provition in the Act be made for the other part between Wolsingham & Alston the Country will have the disadvantages of Pay Gates with out good Roads made as has ben the case of several Turnpikes. Mr Peter Hunter begs (in case Mr B Subscribes) that youll name him as a candidate for Solicitor hoping as acquaintance of his Brother the Cap[tai]n whose now in India that he'll favour him with his Intrest. In looking over your March & June Quart'ly Acct's was surprised to find 200 1/2 Days charged to Adamson's Lad which is 44 1/2 Days more (including 26 Sundays) then theirs days between the 1st Jan'y & 30th June. Your Man Simon Dodd is charged 333. Days in the above Quart'rs. You'll please to explain the above charges, & I desire for the future the No of Days that each Person works be entered weekly in your Wage Book saing what kind of work they have been imployed at each Week. Your man cannot be allowed Days Wages & piece work at the same time

Mr Emerson Bladon

Dukesfield 1st Octob'r 1792

I did not expect to have found so much Lead at the Bankfoot as I did last Thursday, as we had so great a No. of Carts ingaged for the Low, or East stage; Mr Hall was not at Home, that I could get no Acc't f'm him, but was told that you would not let them bring Lead in but upon set Days; I beg for the future that the Carriagemen that's taken on to

Carry Lead f'm Apperly yard to Bladon may be permitted to bring in Lead there when ever there's at in the Yard at Bankfoot. The Flood last Sunday has distroyed our Dam, & has made so great a Wash in the Gravel Bed that we cannot repair properly this Winter & as something must be don to keep the Mill &c at Work till next Spring shall be greatly obliged to you if you could buy 20 or 30 Old large Corves or Coals Baskets & send to the Bankfoot as soon as you possibly can, for I cannot think of any other method of supporting at this Season the remainder of the Gravel bed; thin by sinking them w[i]th Stones. Youll please to give me a line by the Return of the post, whether I may depend of your procuring the above, for some method must be taking immediately to secure it.

Dukesfield 2d Octob'r 1792

Last Saturday we finished the Temporary Dam & got the Water down the Old Race, but the Flood on Sunday night has swept the whole of the New work and part of the Old quite away and teared up the Sand and Gravel Bed above the Old Dam for 20 or 30 yds to a great depth so that the Expençe will be dubble now to make a Dam to secure the Gravel Bed & the Temporary Dam to the new Race. The Water was so high Yesterday that we could not ascertain the damage done to the uper dam, but I suppose that the Smelting &c will not be stoped on that Account longer than a Week. The Continual Wet Weather has made the Lead ways f'm this Mill almost unpassable w[i]thout some of the worst places be mended it will not be possible to get any more Lead to Market f'm the Mill this Yr except there should be a Frost. Our best Carriagemen have wrought their Horses so low f'm the harshness of the Season that I fear that if we wear to Repair the bad places of the Road & give a greater price for 4 Horses cannot doe ye Work that 3 did in Sum[me]r that the quantity that would be got moved would be small, as the Harves[t] is so late in the Neighbourhood of our best Carriagemen for when I roed the Lead way Last Thursday 3/4 of the Corn between Hedly and hear was in the Fields. Dukesfield 17th Octob'r 1792

Sir,

I subscribed at the Meeting for Mr Beaumont conditionally, that a draught of the Bill be laid before Mr Hopper Williams for his opinion of the Clauses as to the Ore

Carriage &c, and in case he disapproved of them Mr Beaumont's subscription to be void for the Subscribers (from the increase of the Subscriptions as youll see below) were very shy as to the proposed Clauses, & maid several objections; on consulting w[i]th Mr Emerson & Mr Dodd we thought it advisable to put Down Mr B. as a Subs[cribe]r that the draught of the Act might be laid before Mr H Williams in behalf of the Lead Owners, for Mr Dodd had not got an Answ[e]r f'm the Co. to impowr him to Subscribe for them, though he did not doubt but they would Subscribe 250 or 300. Another meeting was fixed on the 5th Nov'r &, as the Clauses are to be approved of by Mr Williams there will be no occasion for my attending it. Mr Peter Hunter was choose Solicitor. Mr Hunter of the Harm.e [possibly the Hermitage on the north side of the Tyne from Hexham, owned by John Hunter, Isaac's brother] - offered to rase the Mo[ney] to extend the Branch from Pont Burn to join the Corbridge North Road near Slotley [Shotley] Bridge, & Mr Pearson of Durham proposed to do the same for a Branch from Wolsing[ha]m to Durham bouth w[hi]ch propositions are to be settled at the next meeting -

The weather still continues so unfavourable that the Ore & Lead Carriage will be soon totally stoped, and unless a hard frost set in betwixt now and Christmas no more Lead will be got to Market this yr.

Dukesfield 12th Nov'r 1792

You may be assured that no opportunity shall be lostd in getting all the Lead to Markett that I possibly can though fear with all the exertions that the quantity will be small, these few fine days has made all very busy to get the seed into the Ground and till that's don not a Carriagemen can be got at any price, but hope if this Weather continue that we shall be able to send a little more from this Mill; their Horses are Wrought dow so low from the badness of the Roads &c that 4 cannot now do the work of 2 so that if we were to advance the price the quantity that could be got down would be but small & if the spring should be favourable they would not move w[i]thout the same price; if what's upon the Roads & the little matter we may send from heare would compleat your Sales would you to trust to the Spring reather then advance the price now there's 7400 p[ie]ce[s] 11 & 12 Sto Lead & 8670 of 8 Sto Lead upon the Roads on the 3 inst. The wet Weather has maid us short of peat Coal & Cinders so that all the Carts

that we can at this season rase will do little more then keep the Mill & Refinery going
The Dam Races &c we have secured here & at Rookhope, but not the whole at
Allanheads but expect this week will finish that, the Rains hindred us greatly by
keeping the Burns allways high which added much to the Expence for there was no
trusting to the Weather taking up; least another Flood should have swept the whole
away & stoped the Works.

Youll Recieve a Plate of Silver by the Tuesday's Carriers & also a brace of Partredges
& Gray Plover which you'll please to accept.

To Mr Forster Allanheads

Dukesfield 13th Nov'r 1792

Dear Sir

Finding the Roads so bad to Rookhope yesterday & not starting so soon as I
purposed durst not take Allanheads in my way as I promised you; the Shire carriers
have quite given over coming to the Mill so that theres no chance of their bringing in
the Ton Tail Ore to this Mill this backend, & if it had not been for the reasons that you
gave, would not have let it gone to Rookhope which you may now send there; but
expect that for the future that my Orders will be complied with as I entend that all the
Ton Tail Ore shall be smelted at this Mill & if the Washers or the person that deliv'rs it
does not choose to let it come at the proper season it shall ly at the Grove over Winter
for the time to come. You promised before Mr Blackett when last at N.Castle that you
would make convenience at Wolfcleugh Engine for the whole of the Water in the Burn
to come past her, even when the Engine was not working, so that the works at the Mill
might not be stoped; when there yesterday find that the Stamp Mill is off for want of
Water; I therefor beg, Youll give orders for it being don in the manner you spook off
without loss of time, or will be obliged to Repair the Dam which cannot be don at a
little Expence.

I was sorry to find by Isaac that you had been soo poorly since we were in town but hope you have got better. The Lease for Apperley Lane was executed on the 13: June 1793 [1773?] for 21 Yrs by Mr Surtees of Ackworth so there will be 2 Yrs to go of the Lease as it would not commence till Mayday 1773. I was told the other day that the Com[missione]rs of the South Road at their last meeting resolved to fix a Pay-Gate upon the Branch leading to Apperley Bankfoot to make the Lead have two pay Gages on that Road w[hi]ch I think should be a caution not to suffer new Turnpike Bill to pass near the Mining Country without clauses to prevent their oppressing that Trade, and as Mr Beaumont is in London it would be advisable for Him to oppose the Bill for the Road from Lobleyhill to Chapel unless a proviso is in the Act to prevent his Ore Carriage paing full Tolls for going only 1/4 mile upon the Road, and that in the Summer. I am sorry that whenever I write to you that it should always be making complaints of the Ore bein sent from your Groves badly dressed for when at the Mills yesterday found what was coming of the New Ore both f'm Sedling & Middlehope were badly washed, sedling most shameful, though I mus own I was more surprised to find whats sent f'm Middlehope both to this & to Rookhope Mill so badly washed when the Mine is so Rich for if you so not then send good Ore, there's little hopes of having it when poor - there was some cutting Ore laid down at Allanheads Mill from Hillhope 2/3 nothing but Sand; when 3 Ore packs would not hold weight you may judge of its quallity, the Bouse Ore f'm there was also very badly dressed – You may f'm me acquaint those that's to see the Ore properly dressed that I shall for the future make the Clarks at the Mills keep an Acco't of the Ore that comes badly dressed and deduct from the quantity sent to the Mills according to its quality; for I cannot think of having the Mills charged with 1/5 part of refuse instead of Ore) in case I have Mr Blacketts leave so to do which I shall apply for the next time I meet with Ore coming to the Mills badly dressed with out troubling you any more w[i]th my complaining Letters on that head. As I cannot meet you this day at Allandaletown take this method of Acquainting you that I would have all the Tontail Ore to be sent hear both f'm Allanheads & Wolfcleugh - Youll let us know when you have sent of all Sir Thos. Blackett's Ore. I beg that you'll order the Ore to be better washed before you send it to the Mills, for I made a Trial of 6 Bings w[hi]ch only yielded 15 p[iece]s of 11 Stone p[iece]s and I had 6 Bings washed which had 1/3 of refuse taking out of it w[hi]ch you may see the first time you are at Dukesfield as I had it laid by itself - to prevent trouble to you and me for the future. I desire that you will acquaint those that has to see the Ore properly dressed, that I shall consult Mr Blackett (if not better washed for the future) to de[d]uct f'm the quantity sent to the Mills in proportion of its quality w[hi]ch I fear will not be better then what I have named above. I flatter myself that this will have the desired effect w[i]thout giving either you or me further trouble being sure that you have Mr Beaumonts interest at Heart & I am sure if you had seen the Ore that you would not have lett it be sent to any Mill.

When at Allanheads Mill on the 3d Mr Sparke made a complaint against your Man Hutchinson of being bribed by Spark the Washer to team Bous Ore among the Cutting Ore & that he came to the Mill in the Night that he might not be detected. I saw the Ore, it is as good as what was laid down for Bous I believe the complaint proceeds from malice, but being maid by the Clark at the Mill must have the matter fully investigated, therefor beg that you'll take the trouble by going to the pirson that delivers the Kilhope Ore (for Spark does not think him innocent & learn whether Emersons, Sparks Man, & your Man did not all fill at the same Ore at the mine, and whether he cals it Bous or Cutting Ore if your Man is innocent the aspirtion ought to be removed & shall expect to hear from you on the subject.
